

Suheil J. Muasher, M.D.

Dr. Muasher has been recognized nationally for his excellence in teaching. He received his undergraduate and medical training at the American University in Beirut prior to completing his Obstetrics and Gynecology residency at the Greater Baltimore Medical Center and Johns Hopkins University and his fellowship training at Johns

Hopkins University School of Medicine and at the Jones Institute of Eastern Virginia Medical School. After his 20-year affiliation with the Jones Institute (during which he served as Director of IVF, Director of the Division of Advanced Reproductive Technologies, and the Division of Reproductive Endocrinology and Infertility), he became a Clinical Professor of Obstetrics and Gynecology at George Washington University in Washington, D.C., as well as at Johns Hopkins in Baltimore (2004-2012). He joined the Department of Obstetrics and Gynecology at Duke in 2012 as a Professor in the Division of Reproductive Endocrinology and Infertility and served as the Vice Chair for Education (2016-2017) as well as the Director of Graduate Learning and Academic Development (2017-2019). He is currently Professor Emeritus of Obstetrics and Gynecology at Duke.

Throughout his illustrious career, Dr. Muasher has trained more than 75 fellows in reproductive endocrinology and infertility (REI). Numerous medical students, residents, and fellows have experienced his leadership in academic medicine and have not only gained the fundamental basis needed to develop a depth of knowledge but have subsequently been trained and recruited by leading institutions both nationally and internationally. He was granted the Council on Resident Education in Obstetrics and Gynecology (CREOG) award for teaching four times. Dr. Muasher has published more than 200 peer-reviewed papers and 15 book chapters, several of which are among the most highly cited and read in reproductive medicine literature. Most of the publications have involved tutoring and mentoring fellows and residents in the conduct of research, interpretation of data, and writing of manuscripts. He was awarded the national Kavoussi Family Outstanding Teacher Award in 2018 by the Board of Directors of The American Society for Reproductive Medicine.
